Severe Weather Outlook Sunday, August 06, 2017

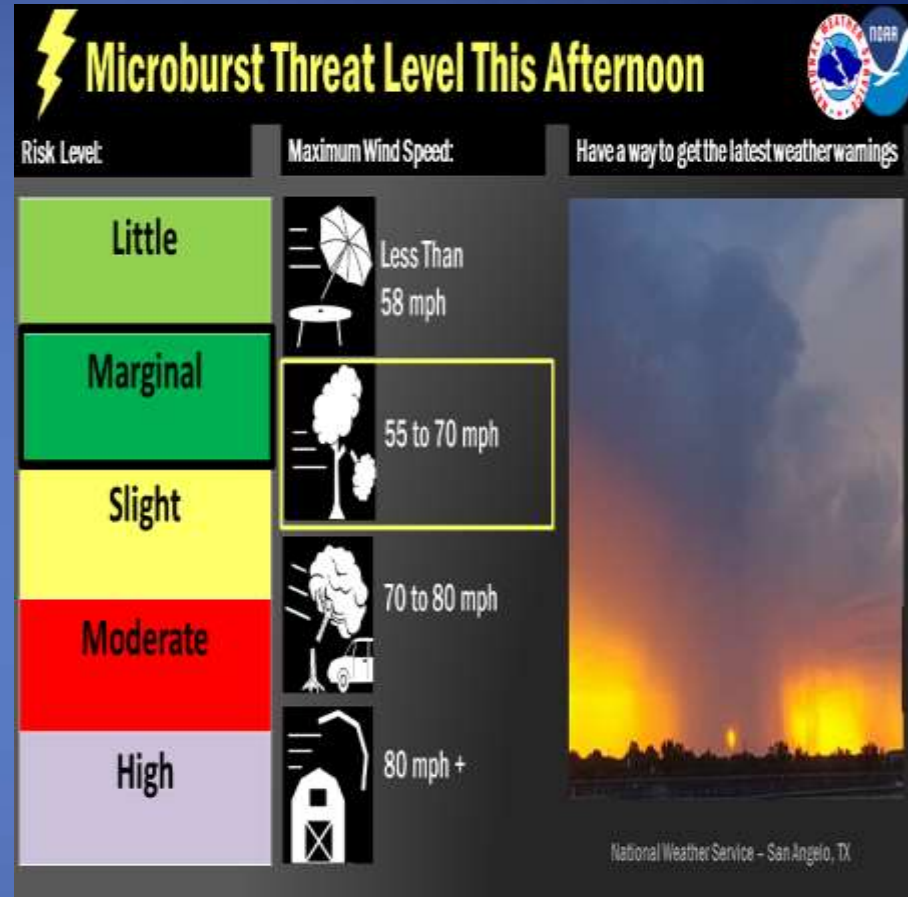

National Weather Service
Storm Prediction Center

<http://www.spc.noaa.gov>

Hazardous Weather

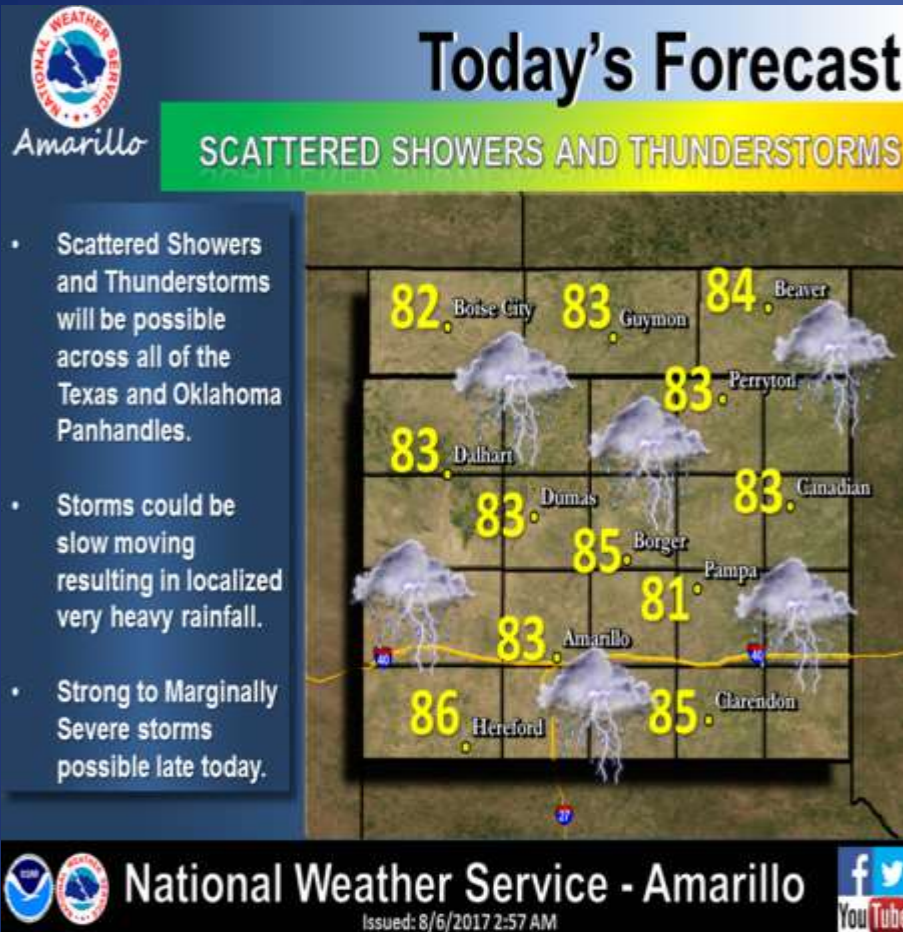

Heat Advisory will be in effect for Jim Wells, Kleberg, and Nueces Counties from Noon to 7 PM CDT today. Maximum heat indices will be 110 to 114 degrees for the areas under the Heat Advisory. Elsewhere, afternoon heat indices between 105 to 109 degrees are expected over the remainder of South Texas. These high heat indices are potentially dangerous, so follow the precautions and advice in the graphic.

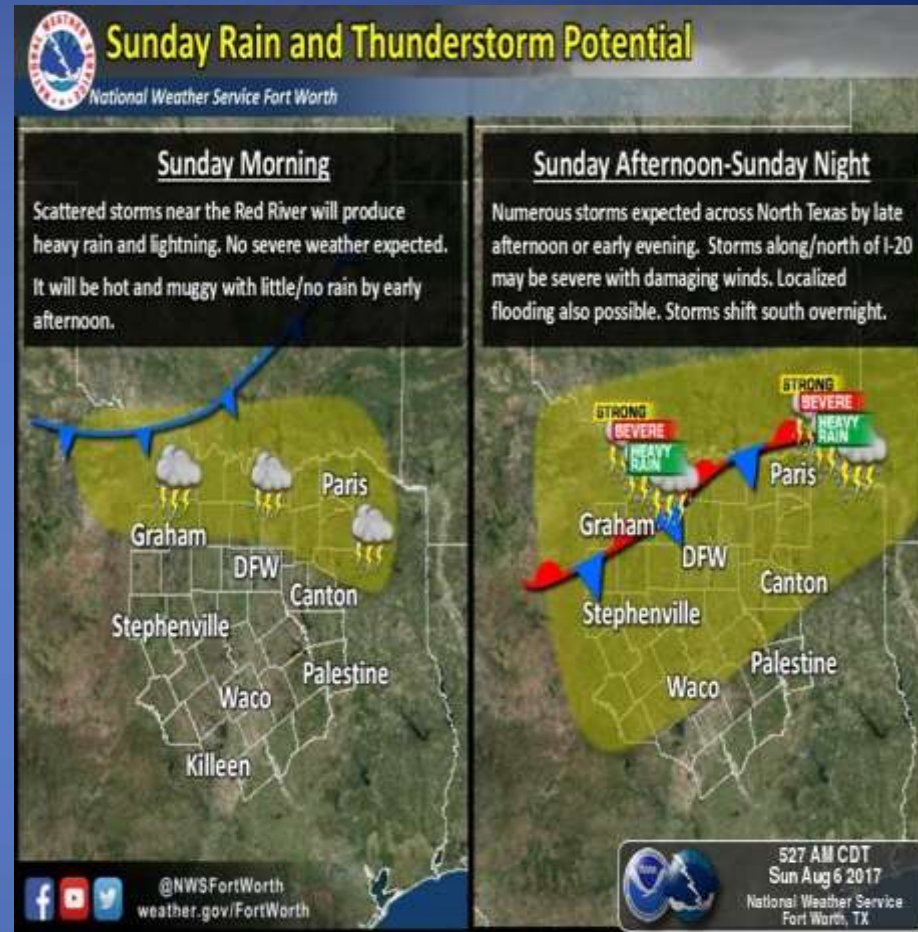

With highs climbing to near 100 today, isolated to scattered thunderstorms are possible this afternoon. Any one of these storms can produce damaging thunderstorm winds greater than 55 mph.

Hazardous Weather

A little cooler today with highs mainly in the 80s. Isolated to scattered showers and thunderstorms are expected to develop later today and this evening across most, if not all, of the Texas and Oklahoma Panhandles. A few storms could become strong to marginally severe later today and this evening with strong wind gusts up to 50 to 60 mph and locally very heavy rainfall.

Scattered thunderstorms will affect areas near the Red River this morning before hot, muggy, and mostly dry conditions take hold by early afternoon. Later this afternoon and evening, widespread showers and thunderstorms are expected to develop across North Texas, some of which may be severe with damaging winds. Localized flooding due to heavy rain is also possible. Activity will shift southward later tonight.

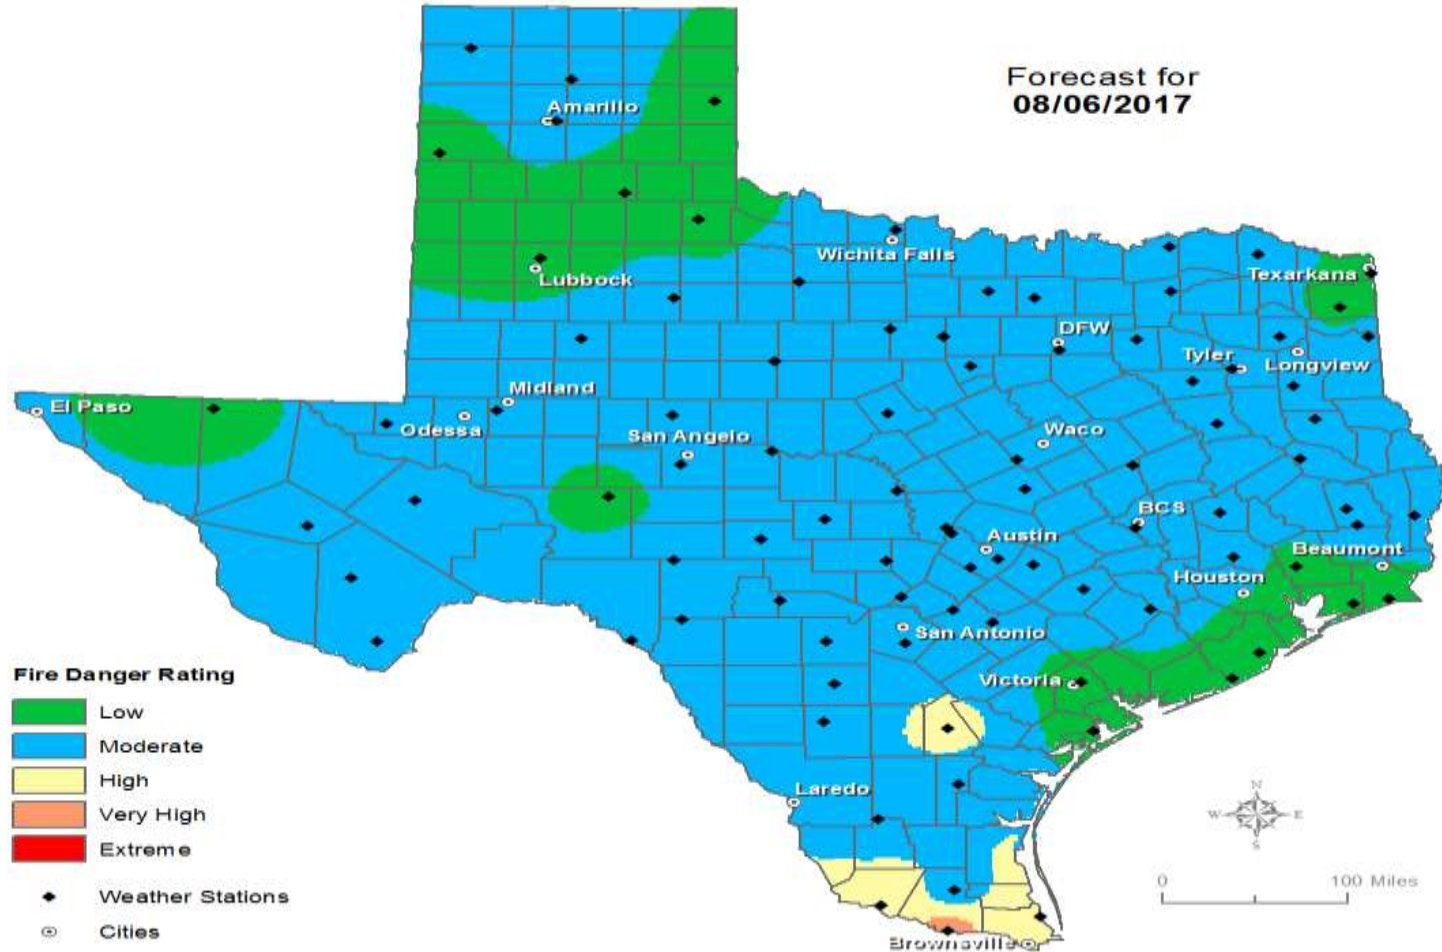

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
08/05/17	Severe Thunderstorm Warning	Archer, Armstrong, Baylor, Carson, Donley, Gray, Hemphill, Lipscomb, Kinney, Throckmorton and Val Verde Counties
